

OceaniCure™ SC-23P™

Sea Cucumbers have been prescribed in Oriental Medicine for centuries due to their unique properties and measurable effects on human health.

The *Cucumaria frondosa* species from the North Atlantic is the most researched of all by medical scientists. It is also the only species not found on the CITES endangered species list because it is harvested from well-managed fisheries. Our unique blend, combined with our proprietary processing methods, ensures that the maximum content of high-value bioactive components remains in every capsule.

We recommend doctors include SC-23P to their supplement protocols for patients dealing with indicated conditions and for general health. Label serving sizes of 1000mg, twice daily, are based on body weight of 150-200 LBS.

These statements have not been evaluated by the US Food and Drug Administration. This product is not intended to diagnose, prevent, treat or cure any disease.

According to medical research, the following components of the Sea Cucumber cells are indicated in joint health, wound healing, oral health, blood thinning, cancer cell apoptosis and anti-angiogenesis, anti-inflammation, blood sugar regulation, antioxidation, and general nutrition:

- **Fucosylated Chondroitin Sulfate**
- **Glycosaminoglycans (GAGS)**
- **Various Tri-Terpene Glycosides**
- **Saponins including Frondoside-A, & Cucumariaside A2**
- **Polysaccharides & Oligosaccharides**
- **Omega-3 & Omega-6**
- **Palmitoleic Acid**
- **Collagen & Gelatin**
- **Cerebrosides**
- **Phenolics**
- **Carotenoids (Canthaxanthin, Astaxanthin, Vitamin A)**
- **Essential Minerals**
- **Vitamins**
